Introduction

NYC Parks is the steward of more than 30,000 acres of land, or 14% of the City. We are responsible for the construction, maintenance, and programming of public parks under our jurisdiction. In order to fulfill our mandate, we employ landscape architects, architects, and engineers who design parks and recreational amenities; forestry staff who plant and care for trees both in parks and on sidewalks; gardeners who grow and plant flowers and shrubs; recreation professionals who organize programming to help New Yorkers keep fit and have fun; park rangers and enforcement officers who teach the public about the natural world and uphold park rules; events professionals who bring cultural and sporting events to our parks; and outreach staff who engage volunteers and non-profit partners in improving their parks. This report does not include all of the work above, but focuses on our efforts to keep our parks clean and safe. This fundamental maintenance work is completed by park workers and supervisors who are responsible for day-to-day park cleaning, and specialized crews and tradespeople who maintain and repair park infrastructure.

Release of this maintenance report accompanies a larger effort to provide the public a better understanding of how their parks are run, and to engage with them on improving how NYC Parks operates. Indeed, increased transparency has already yielded significant benefits for both New Yorkers and their parks. In 2014, Parks launched an online tracker for park capital improvement projects, allowing anyone to chart project progress from initial design through construction completion. In 2016, Parks released the data from our decennial tree census and collaborated with volunteers from New York City's civic technology and tree stewardship communities to use this data to better manage the urban forest, in what was Parks' first open data hackathon – the TreesCount! Data Jam. In 2017, we led the City's first "Open Data for All" Workshops, teaching members of the public how to access, interact with and analyze our data; and began an internal effort to define, document, and publish all Parks data sets online. We continue to increase the volume and quality of our datasets, and we hope this report and data release can be another means of engaging with New Yorkers about their parks and improve public understanding of park maintenance.

Understanding Park Maintenance Needs

It is important to understand that this report provides a summary of maintenance labor inputs, and not any measure of the result or outcome of this labor. Some parks receive far more cleaning time than others, while some have many more work orders written for repairs. This is by design, and a result of the unique characteristics, amenities, and usage in each park. Although parks of similar size and amenities will generally have comparable costs of service, these costs can also vary considerably, even among superficially comparable parks.

A lawn that is a frequent host of barbecues will require different care from lawns that are used for concerts, picnics, or meditation. The maintenance demands of an acre of softball fields are very different from an acre of basketball courts, or soccer fields, or hiking trails. A park near the water will probably require more frequent painting. Playgrounds near a busy elementary school will require more frequent repair, and those repairs will likely be with more expensive, sturdier parts. These examples are just a few of the many factors that will affect the amount of hours and dollars spent cleaning and maintaining a site. With these distinctions in mind, we do not aim for identical inputs of time and money, but equitable outcomes: clean, safe, and welcoming parks for all New Yorkers to enjoy.

The amount of cleaning and maintenance a park receives is historically based on the on-the-ground knowledge of our staff, which represents decades of experience informed by daily observations made while parks are inspected, cleaned, and repaired. We also supplement this institutional knowledge with quantitative data-driven models. Parks is piloting efforts to better understand the relationship between usage and amenities, and exploring ways to passively measure park usage using infrared sensors and

mobile device GPS counts. In aggregate, these efforts represent Parks' commitment to leverage data to better understand our maintenance needs and to improve how we care for public spaces.

How Parks are Maintained

An individual park will receive a variety of maintenance services from a variety of Parks staff. Parks are grouped together within park districts, which generally align with community boards. One or more park districts are combined into sectors that share resources for daily maintenance. Some of the largest parks, such as Van Cortlandt Park and Flushing Meadows Corona Park, constitute sectors by themselves.

In December of 2017, NYC Parks added the regional designation to its management structure. Regions are made up of one or more sectors, and regional managers provide high-level, strategic planning and support for Parks managers, including maximizing resources between Districts and Sectors. When regions were established, some sectors were reorganized to include a different set of park districts while others remained the same. As a result of sector reorganization, year-to-year costs for sectors from Fiscal Year 2018 and on will not necessarily be comparable on a one-to-one basis with Fiscal Year 2017 and prior fiscal years.

Daily Park Maintenance

Sector staff perform daily maintenance, as well as garbage collection, snow plowing, and basic repairs and upkeep. These staff are tasked with cleaning a park for as long and as often as it takes to make it clean and safe for the public. There are codified standards of cleanliness and safety, as well as expectations of cleaning frequency. To ensure these standards are met, every park receives at least two random audit inspections per year by highly-trained inspectors from the Parks Inspection Program (PIP), as well as monthly inspections by the sector's supervisors. NYC Parks measure daily park maintenance by looking at outcomes as captured in the inspection ratings. The priority is to ensure that a park is clean and safe, whether it took one hour or four hours to achieve that result. This report provides a summary of those inputs.

For cleaning service, a park is considered "mobile" or "fixed post." Mobile crew staff visit multiple parks throughout a sector, following a specific route. Fixed post staff are assigned to a single park or, most commonly, to a group of nearby parks (sometimes known as "split post"), which are generally high-use, high-priority locations such as playgrounds, or out-of-the-way sites that are not feasible to service by mobile crew. In order to host fixed post staff, a park must have a facility with storage space, a bathroom, and heat (generally a public restroom). A fixed post-eligible site may also be cleaned by a mobile crew, and the type of crew deployed at a site depends on seasonal needs, daily staffing levels, and other priorities as determined by sector supervision. Whether they are driving from park-to-park as a mobile crew, or walking around on a fixed post, the same staff will generally visit a given park each day and become familiar with the park's visitors and patterns of use.

Parks are cleaned to a standard—not for a set length of time—and the amount of hours spent cleaning an individual park can vary greatly depending on how it was used the previous day. Some parks are consistently more heavily utilized than others, or are utilized in a manner that requires additional maintenance resources. In other words, not all park acres need the same level of service. Usage can also vary considerably by season. A crew arriving at a park that is mostly clean will not spend a large number of hours there—they will move on to the next park that needs their attention. Therefore, the average number of weekly cleaning visits is included in this report to give New Yorkers a better sense of how we are taking care of each park.

Specialized Maintenance Services

In addition to sector-level services, some maintenance work is performed by more specialized staff who maintain parks throughout a borough or around the city. These services are generally more practical or cost-effective to provide at a borough or citywide level rather than in each sector. Examples of borough-level services include work involving heavy or specialized equipment, like full-size tractors or roll-off container trucks; or work requiring significant, specialized training, like borough tradespeople, forestry, and horticulture operations. Citywide-level staff use equipment and complete work that would be inefficient or impractical to provide even at the borough level. This work includes the seasonal preparation of pools and repairs to their filtration systems; maintenance of heating, ventilation, and air conditioning (HVAC) systems; maintenance of synthetic turf fields using specialized equipment; operation of sewer trucks; fabrication of signage; and any other large work orders beyond the staffing capabilities of an individual borough.

While nearly all of this specialized, borough or citywide-level maintenance is performed on an as-needed basis, some parks—depending on amenities present and composition of sector staff—will receive routine service from specialized maintenance staff. A park with ballfields or decorative lawns might have borough crews seasonally seed, groom, and water them. The same specialized maintenance can apply for gardens, planted areas, or areas of ecological importance. Assets with a long expected life, including parts of the physical plant, such as HVAC or pool filtration systems, receive scheduled preventative maintenance. Playgrounds will have their swings regularly changed as seats and bearings wear. Spray showers, most drinking fountains, and some public restrooms will have their water turned off and be “winterized” each autumn; this process is performed in reverse each spring.

Aside from the routine, scheduled maintenance discussed above, specialized maintenance staff are dispatched only when they are needed to correct problems. Therefore park-level costs for specialized maintenance will fluctuate tremendously from year to year. A park with a broken pipe flooding a building might require thousands of dollars to repair the pipe and restore any damage to the building in one year, but only tens of dollars in specialized maintenance if nothing breaks the next year. Newer parks typically require less specialized maintenance than older ones—their structures are more modern, their trees are younger—so they present fewer problems. Parks with more visitors will have more wear and tear, and consequently require more specialized maintenance.

About the Data Used in this Report

The data used to generate park-by-park costs in this report is pulled from the Daily Tasks database, which tracks routine cleaning of parks, and the Asset Management Parks System (AMPS) database, which tracks work orders and parts used for park repairs. All hours are rounded to the nearest hour, all costs are rounded to the nearest dollar, and all acreage is rounded to the hundredth of an acre.

Only this Daily Tasks and AMPS work is recorded and reported by park. All other maintenance work in this report is represented by payroll distributions to staff in relevant titles and is reported at the sector, borough, or citywide level. Depending on needs and resource availability, the same services may be provisioned by different groups at different properties. For example, a park might take responsibility for its own grass trimming, while a borough crew trims grass on long medians. Therefore direct comparison between even similarly sized sectors may be misleading due to differences in park amenities and service provision arrangements.

Included in this Report

This report includes the following data for each park under NYC Parks' jurisdiction. Parks are grouped with their "parents," so a zone, playground, or building within a larger park will appear under that larger, parent park's entry.

- Tracked at the park level in the Daily Tasks database:
 - Litter removal
 - Snow and ice removal performed by hand
 - Leaf removal
 - Cleaning and stocking of public restrooms
 - Removal of small amounts of graffiti
- Tracked at the park level using AMPS work orders:
 - Corrective repair work performed by Parks' tradespeople,
 - Removal of large amounts of graffiti, fence repair, asphalt repair, pest abatement, and other work performed by Parks' borough crews
 - Seasonal maintenance, such as the activation and deactivation of drinking fountains
 - Parts and materials used to complete work orders
- Tracked at the borough or city level using AMPS work orders:
 - Repair work performed by Parks' tradespeople not attributable to a specific park
 - Fabrication of parts or preparation of materials for borough or citywide inventories
 - Vehicle repairs completed by shops staff
- Performed at the sector or borough level, accounted for with payroll data:
 - Locking and unlocking of parks and park public restrooms
 - Mechanized beach cleaning
 - Basic structural maintenance completed by sector staff
 - Snow plowing and mechanized salting
 - Operation of garbage collection trucks ("packers")
 - Weeding
 - Extermination
 - Horticultural maintenance
 - Tree maintenance
 - Power washing
 - Athletic field preparation
 - Sector level supervision and clerical staff
 - Borough operations staff, including Chief and Deputy Chief(s) of Operations.

Not included in this report

- Properties not under the jurisdiction of Parks, including some Greenstreets, Greenthumb gardens not on parkland, and all Schoolyard to Playground sites
- Day-to-day pool, marina, and recreation center operations. Repairs to these facilities are generally tracked using AMPS work orders and included in park-level costs.
- Fleet operations, including auto mechanics. Vehicle repairs performed by Parks' shops staff are generally tracked using AMPS work orders and included in borough-level costs.

- Most volunteers, including both those working with independent organizations or with our stewardship staff (such as Partnerships for Parks)
- Park conservancy staff or volunteers (reported under Administrative Code Section 18-134)
- Tree planting, invasive species removal and other services performed by Parks' Forestry, Horticulture and Natural Resources (FHNR) staff or volunteers

Data Caveats

Apparent anomalies in the data for individual parks may be attributed to one of several variables and where possible we have tried to provide additional context in the footnotes of the report to aid interpretation. In some cases, a particularly low number of hours reported may be due to a portion of a given park being closed for renovation or a significant percentage of the park consisting of natural areas. In other cases, a particularly high number of hours reported may be due to a special initiative being piloted in the park to support citywide operations improvements. While we have attempted to explain every park peculiarity and data anomaly with footnotes, the footnotes are not exhaustive, and should not be interpreted as being so.

The AMPS system is used by several different units: borough and citywide crews and shops, Parks' sign shop, preventative maintenance teams to track their work, and is also used by Parks' storehouses throughout the city to manage their inventories. With these many uses in mind, this data has this additional caveat:

- Parts and materials are only included in labor costs where they are directly attached to a work order. Work orders, primarily system-generated, to move parts from one storehouse to another or to reconcile storehouse inventory, are excluded from this report. In addition, some parts included in the report are donated materials. Where possible, the cost of these donated materials is excluded from cost figures.

Report Column Definitions and Calculations

Table 1 – Park-Level Services

- **Property Number** – The unique identification number assigned to each park.
- **Borough Code** – Describes the (abbreviated) borough in which the property is located. All properties fall within a single borough.
- **Sign Name** – The official name displayed on the physical sign(s) of each park.
- **Category** – The category assigned to the park for inspection purposes.
- **Site Amenities** – The broad amenities present within each park. The amenities included in this report are athletic facilities, beaches, public restrooms, natural areas, playgrounds, and hiking trails.
- **Sector Name** – The name of a sector. For individual parks, this is the sector that the park belongs to. One or more park district(s) are combined into sectors that share resources for daily park maintenance.

- **Sector Description** – The description of the districts that make up a sector. For individual parks, this is a description of the district(s) that make up the sector that the park is part of. One or more park districts are combined into sectors that share resources for daily park maintenance.
- **Total Acreage** – The number of acres officially mapped as parkland. This can include undeveloped lots or land underwater.
- **Functional Acreage** – The number of acres generally useable by the public and maintained by NYC Parks. This figure is determined by the boundaries inspected under the Parks Inspection Program (PIP). As it excludes undeveloped lots, land underwater, or parkland used for other purposes (for example, the Brooklyn Botanic Garden), this figure is generally smaller than the total acreage. However, in some cases, it will be larger than the “total” acreage because perimeter sidewalks may be included.
- **Average Weekly Hours** – Calculated from Daily Tasks, the weekly average sum of hours spent servicing a park in order to bring it up to PIP standards. This value is calculated separately for each quarter.
- **Average Weekly Cost** – Calculated from Daily Tasks, the average sum of hours spent servicing a park multiplied by the base hourly pay for each job title recorded as providing service. This value is calculated separately for each quarter.
- **Average Number of Days Serviced per Week** – The average number of days per week that a park was cleaned. This value is calculated separately for each quarter.
- **Fixed Post Site** – Sites that are fixed post one day can, depending on available staffing and other operational needs, be cleaned by a mobile crew on another. Since fixed post status for any given park is fluid, a quantitative definition is used in order to determine whether fixed post staff were consistently assigned to a park. This binary yes or no value is calculated separately for each quarter. See Appendix A for details.
- **Total Work Order Cost** - Calculated from AMPS. The sum of hours spent maintaining a park by specialized staff multiplied by the base hourly or overtime rate, and the costs of parts and materials used for this maintenance. See Appendix D for more details. This value is calculated separately for each quarter.

Table 2 – Sector-Level Services

- **Average Weekly Cost** – The average cost per week for staff in each park sector, including overtime and salary differentials, minus the cost of staff already accounted for in the park-by-park (“Average Cost of Service per Week”) figures. See Appendix C for more details. This value is calculated separately for each quarter.

Table 3 – Borough and Citywide Work Orders

- **Total Work Order Cost** – The total cost per quarter for parts and labor of work orders that were completed for a specific borough or at a citywide level. See Appendix D for more details.

Table 4 – Borough and Citywide-Level Services Not Captured in Work Orders

- **Average Weekly Cost** – The average per week of services provided at the borough or citywide level, derived from the pay, including overtime and salary differentials, of these borough or citywide-level staff. Park- and borough-level work order costs are excluded here, as to not double count. This value is calculated separately for each quarter. See Appendix E for more details.

- 1) Richmond Parkway (R065) includes records for property numbers R013,R017A,R030,R047,R065,R088,R115,R118 andR129.
- 2) This site, or a portion of this site, was closed for construction for part of Fiscal Year 2024.
- 3) This site, or a portion of this site, was closed for construction during Fiscal Year 2024.
- 4) This site is maintained in partnership with the Central Park Conservancy. Costs of their maintenance are not reflected in this report.
- 5) Central Park (M010) includes records for property numbers M010 andM062.
- 6) This site is maintained in partnership with the Alliance for Flushing Meadows Corona Park. Costs of their maintenance are not reflected in this report.
- 7) This site is maintained in partnership with the Alley Pond Environmental Center (APEC). Costs of their maintenance are not reflected in this report.
- 8) Alley Pond Park (Q001) includes records for property numbers Q001,Q001A andQ356.
- 9) This site is maintained in partnership with the Prospect Park Alliance. Costs of their maintenance are not reflected in this report.
- 10) Prospect Park (B073) includes records for property numbers B073 andB040.
- 11) This site is maintained in partnership with the Forest Park Trust. Costs of their maintenance are not reflected in this report.
- 12) Cleaning and maintenance of the Cunningham Park's ballfields is shared with the Mary Louis Academy, St. Francis Prep, and the Auburndale Soccer Club. Costs of their maintenance are not reflected in this report.
- 13) Rockaway Beach and Boardwalk (Q162) includes records for property numbers Q162,Q162E,Q162H,Q162J,Q162J01,Q163,Q164 andQ050.
- 14) This site is maintained in partnership with the Riverside Park Conservancy, which assists with horticultural care of the site. Costs of their maintenance are not reflected in this report.
- 15) Riverside Park (M071) includes records for property numbers M071,M072,M140 andM048.
- 16) This site is maintained in partnership with the Randall's Island Park Alliance. Costs of their maintenance are not reflected in this report.
- 17) This site is maintained in partnership with the Bronx River Alliance, which maintains park trails and the area along the Bronx River. Costs of their maintenance are not reflected in this report.
- 18) Highland Park (Q020) includes records for property numbers Q020,B047 andB047A.
- 19) Crotona Park (X010) includes records for property numbers X010 andX010C.
- 20) This site is maintained in partnership with the Millennium Group. Costs of their maintenance are not reflected in this report.
- 21) Crocheron Park (Q012) includes records for property numbers Q012 andQ012B.
- 22) Kissena Corridor Park (Q300A) includes records for property numbers Q300A andQ300A1.
- 23) This site is maintained in partnership with the Southern Queens Park Alliance. Costs of their maintenance are not reflected in this report.
- 24) Roy Wilkins Recreation Center (Q448) includes records for property numbers Q448 andQ210.
- 25) This site is maintained in partnership with Red Hook Initiative, which maintains the Red Hook Farm garden property at 560 Columbia Street. Costs of their maintenance are not reflected in this report.
- 26) This site is maintained in partnership with Gateway Realty. Costs of their maintenance are not reflected in this report. NYC Parks maintains the site's sitting area.
- 27) This site is primarily maintained by the Battery Park City Parks Conservancy. Costs of their maintenance are not reflected in this report.
- 28) This site is maintained in partnership with the Battery Conservancy. Costs of their maintenance are not reflected in this report.
- 29) This site is maintained by New York Restoration Project.
- 30) This site is primarily maintained by the Brooklyn Bridge Park Conservancy. Costs of their maintenance are not reflected in this report.
- 31) This site is primarily maintained by the Bryant Park Corporation. Costs of their maintenance are not reflected in this report.
- 32) This site is primarily maintained by the Friends of the High Line. Costs of their maintenance are not reflected in this report.
- 33) Park (X091) includes records for property numbers X090 andX091.
- 34) This site is maintained in partnership with the Union Square Partnership. Costs of their maintenance are not reflected in this report.
- 35) This site is primarily maintained by Socrates Sculpture Park. Costs of their maintenance are not reflected in this report.
- 36) This site is maintained in partnership with the Madison Square Park Conservancy. Costs of their maintenance are not reflected in this report.
- 37) Bronx River Parkway (X004) includes records for property numbers X004 andX004A.
- 38) Grant Park (X271) includes records for property numbers X271 andX271A.
- 39) Frederick Johnson Playground (M159) includes records for property numbers M141 andM159.
- 40) This site is maintained by Hudson Yards-Hell's Kitchen Alliance.
- 41) Bathgate Playground (X252) includes records for property numbers X252,X252A andX252B.
- 42) This site is primarily maintained by Lincoln Center. Costs of their maintenance are not reflected in this report.
- 43) Vidalia Park (X266) includes records for property numbers X266 andX266A.
- 44) Al Quifones Playground (X179) includes records for property numbers X179 andX179A.
- 45) This site is primarily maintained by Luna Park. Costs of their maintenance are not reflected in this report. NYC Parks maintains the site's sitting area.
- 46) This site is primarily maintained by an NYC Parks gardener, whose work is not reflected in this report.
- 47) Flatbush Malls (B178) includes records for property numbers B178,B179 andB180.
- 48) Augustus St. Gaudens Playground (M226) includes records for property numbers M226 andM227.
- 49) This site is primarily maintained by the Kingsbridge Little League. Costs of their maintenance are not reflected in this report.
- 50) This site is primarily maintained by the Federal Realty Investment Trust. Costs of their maintenance are not reflected in this report.
- 51) Brooklyn Heights Promenade (B223DK) includes records for property numbers B223DB,B223DC,B223DH,B223DI andB223DK.
- 52) Flushing Greens (Q100) includes records for property numbers Q100 andQ100A.
- 53) Ranaqua Playground (X272) includes records for property numbers X272 andX272A.
- 54) Dawson Playground (X164) includes records for property numbers X164 andX164A.
- 55) This site is primarily maintained by Asphalt Green. Costs of their maintenance are not reflected in this report.
- 56) Tudor Grove Playground (M203E) includes records for property numbers M203D andM203E.
- 57) This site is maintained in partnership with the Fund for Park Avenue. Costs of their maintenance are not reflected in this report.
- 58) This site is primarily maintained by the 34th Street Partnership. Costs of their maintenance are not reflected in this report.
- 59) This site is primarily maintained by the Lincoln Center Business Improvement District. Costs of their maintenance are not reflected in this report.
- 60) This site is primarily maintained by the Times Square Alliance. Costs of their maintenance are not reflected in this report.
- 61) This site is primarily maintained by the skating rink concessionaire. Costs of their maintenance are not reflected in this report.
- 62) This site is primarily maintained by the Brooklyn Botanic Garden. Costs of their maintenance are not reflected in this report.
- 63) This site is primarily maintained by the Brooklyn Museum. Costs of their maintenance are not reflected in this report.
- 64) Meredith Woods (R163) includes records for property numbers R163 andR112.
- 65) This site is primarily maintained by The Public Theater. Costs of their maintenance are not reflected in this report.
- 66) This site is primarily maintained by Wave Hill. Costs of their maintenance are not reflected in this report.

Appendix A: Fixed Post Calculation

For the purposes of this report, a park is considered fixed post if it received fixed post service on 43% or more of the days in the quarter, or about 3 out of 7 days. Fixed post service is defined as:

- The work was entered in the fixed post module of Daily Tasks

OR

- Work was entered in the mobile crew module of Daily Tasks, but the park had been visited by any staff for 4 or more hours on a given day.

Appendix B: Park Cleaning Crews Calculations

I. Average Weekly Costs

Since costs are not directly recorded in the Daily Tasks system, they were calculated from the number of hours reported. The following series of calculations were carried out to arrive at the average weekly park cleaning crew costs:

1. For accuracy and simplicity, costs were calculated by multiplying the number of hours recorded by the incumbent hourly rate for each title. This was done on an entry by entry basis. Job titles on mobile crews include Associate Park Service Workers (APSW), City Park Workers (CPW), City Seasonal Aides (CSA) and Parks Opportunity Program Participants (POP).

$$Cost_{APSW} = Hours_{APSW} * 28.16$$

$$Cost_{CPW} = Hours_{CPW} * 21.52$$

$$Cost_{CSA} = Hours_{CSA} * 19.99$$

$$Cost_{POP} = Hours_{POP} * 18.54$$

2. The costs were then multiplied by the number of workers reported for each title. This calculation was performed on an entry by entry basis.

$$Total\ Cost_{APSW} = Cost_{APSW} * Number\ of\ APSWs$$

$$Total\ Cost_{CPW} = Cost_{CPW} * Number\ of\ CPWs$$

$$Total\ Cost_{CSA} = Cost_{CSA} * Number\ of\ CSAs$$

$$Total\ Cost_{POP} = Cost_{POP} * Number\ of\ POPs$$

3. The total cost for each entry was then calculated by adding costs calculated for each title.

$$Total\ Cost_{Entry} = Total\ Cost_{APSW} + Total\ Cost_{CPW} + Total\ Cost_{CSA} + Total\ Cost_{POP}$$

4. The total property-level costs per week were then calculated by summing all entries for a property for each week.

$$Total\ Weekly\ Property\ Costs = For\ each\ week\ and\ property: \sum_{Entry} (Total\ Cost_{Entry})$$

- Finally the quarterly average property-level costs were calculated by summing the weekly total property-level costs in a given quarter and dividing by the number of weeks of data entered per quarter for a given property. Note that due to missing data, the number of weeks of available data for a given property does not necessarily equal the number of weeks in a quarter.

Average Weekly Property Cost per Quarter =

For each quarter and property: $\sum_{Week} Total\ Weekly\ Property\ Costs_{Week} / Weeks\ of\ Available\ Data$

II. Average Weekly Hours

- First, the total number of person hours were calculated for each entry. This calculation was done by multiplying the number of hours by the number of workers reported for each entry.

*Total Person Hours_{Entry} = Number of Hours_{Entry} * Number of Workers_{Entry}*

- The total number of property-level hours per week were calculated by summing all entries for a property for each week.

Total Weekly Property Hours = For each week and property: $\sum_{Entry} Total\ Person\ Hours_{Entry}$

- Finally the quarterly average property-level hours were calculated by summing the weekly total property-level hours in a given quarter and dividing by the number of weeks of data entered per quarter for a given property. Note that due to missing data, the number of weeks of available data for a given property does not necessarily equal the number of weeks in a quarter.

Average Weekly Property Hours per Quarter =

For each quarter and property: $\sum_{Week} Total\ Weekly\ Property\ Hours_{Week} / Weeks\ of\ Available\ Data$

III. Average Number of Days Serviced per Week

First, each unique day of work was extracted for each property. If a property was visited multiple times in a day, only the first visit is counted for the purpose of this calculation. Next, for each day a property was visited, a variable holding the value of 1 was assigned indicating the property received service. The following series of calculations were carried out to arrive at the average number of days serviced per week:

- The total number of days serviced per week were calculated by summing all days serviced for a property for each week. Note that the resulting values have a finite range from 1 days to 7 days.

Total Number of Days Serviced per Week =

For each week and property: $\sum_{Week} DaysServiced$

2. The average number of days serviced per week was calculated for each property by averaging the weekly total number of days serviced in a quarter. Note that due to missing data, the number of weeks of available data for a given property does not necessarily equal the number of weeks in a quarter.

Average Number of Days Serviced per Week =

For each quarter and property:

$\sum_{Week} Total\ Number\ of\ Days\ Serviced\ per\ Week_{Week} / Weeks\ of\ Available\ Data$

Appendix C: Sector-Level Services

Because Daily Task data make up only a portion of the sector-level costs (See “About the Data Used in this Report” section of the report body), payroll data had to be used in conjunction with Daily Task data to prevent double counting. Furthermore, Daily Tasks does not capture cost information, so the number of hours needed to be used as a proxy for calculating cost. In order to arrive at sector costs, the following series of calculations were carried out:

1. The total number of hours reported in Daily Tasks were calculated independently for each title by summing all entries for a sector for each week. Note that Daily Tasks only includes the employee titles that comprise our cleaning crews (APSW, CPW, CSA, and POP).

Daily Task Total Weekly Sector Hours_{Title} =

For each week and sector: $\sum_{Title} Daily\ Task\ Hours_{Title}$

2. To calculate the sector-level costs from the payroll data, two separate calculations were performed. This was required in order to account for the cost of employee titles that were already reported in Daily Tasks (cleaning crews of APSW, CPW, CSA and POP) and employee titles that were not reported in Daily Tasks (Park Supervisors, Gardeners, etc.).
 - (a) The total number of hours reported in Payroll were calculated independently for each title by summing all entries for a sector for each week. Note that this calculation was performed only for employee titles reported in Daily Tasks (cleaning crews).

Payroll Total Weekly Sector Hours_{Title} =

For each week and sector: $\sum_{Title} Payroll\ Hours_{Title}$

- (b) The total costs reported in Payroll were calculated independently for each title by summing all entries for a sector for each week. Note that this calculation was performed for all other sector employee titles that were not reported in Daily Tasks.

Total Weekly Sector Costs_{Other Titles} =

For each week and sector: $\sum_{Title} Payroll Cost_{Title}$

3. The differences in hours reported between Daily Task and payroll were then were calculated independently for each title by subtracting the Daily Task hours from the payroll hours for a sector for each week. Note that this calculation was only performed for employee titles that were reported in Daily Tasks (cleaning crews).

Hour Difference_{Title} = For each week and sector:

Payroll Total Weekly Sector Hours_{Title} – Daily Task Total Weekly Sector Hours_{Title}

4. The percent difference in hours was then calculated independently for each title first by dividing the hour differences by the number of hours reported in payroll, and then multiplying the result by 100 for each week and sector. Note that this calculation was only performed for employee titles that were reported in Daily Tasks (cleaning crews).

Percent Difference Hours_{Title} =

*For each week and sector: $\left(\frac{Hour\ Difference_{Title}}{Payroll\ Total\ Hours_{Title}} \right) * 100$*

5. The total weekly sector costs per title were then calculated independently for each title by first multiplying the percent difference by payroll cost and second subtracting the result from the sector payroll cost for each week and sector. Note that this calculation was only performed for employee titles that were reported in Daily Tasks (cleaning crews).

Total Weekly Sector Cost_{Cleaning Titles} = For each week and sector:

*Payroll Cost_{Title} – (Percent Difference Hours_{Title} * Payroll Cost_{Title})*

6. The total weekly sector costs for all titles were then calculated by adding together the total weekly sector costs for each of the titles for each week and sector. Note that this calculation included the addition of employee titles directly cleaning parks and those responsible for other maintenance activities.

Total Weekly Sector Cost = For each week and sector:

Total Weekly Sector Cost_{Cleaning Titles} + Total Weekly Sector Cost_{Other Titles}

7. Finally the quarterly average sector costs were calculated by summing the total weekly sector costs in a given quarter and dividing by the number of weeks, 13, in a quarter.

Average Weekly Sector Cost per Quarter = $\sum_{Week} Total\ Weekly\ Sector\ Cost_{Week} / 13$

Appendix D: Specialized Maintenance Costs

Specialized maintenance, including Parks' tradespeople and boroughwide crews, is generally tracked through our asset management and work order system, AMPS. Depending on the scope of work, work orders are booked either to a specific park, a specific borough, or to the city at large (For more information see the "How Parks are Maintained" section of the report body). Work orders for a specific park are reported in Table 1: Park-Level Services, while work orders for a borough or for the city are reported in Table 3: Borough and Citywide Work Orders.

The AMPS database is structured so that every work order has associated records for each day and person of work. Each entry indicates the date worked, the number of hours of labor, and whether the work was performed on overtime. Work orders also have associated records of any parts or materials that were used.

This analysis only includes labor hours and part/materials in determining work order costs. All labor occurring, and parts used, during the fiscal year are included, even if the work order was created before, or completed after, the fiscal year. Parts have cost values in the AMPS database, while costs of labor hours are derived by multiplying the number of hours by the incumbent pay rate of the title completing the work. Hours marked as overtime are multiplied by 1.5 times the title pay rate, reflecting the overtime premium. Travel hours, since they can be associated with either the origin or destination site, are not included in this analysis, though they are indirectly accounted for in Table 5: Borough and Citywide-Level Services Not Captured in Work Orders, using payroll data.

Total Quarterly Property Costs =

For each quarter and property/borough:
$$\sum_{WorkOrder} Labor\ Cost_{WorkOrder} + Parts\ Cost_{WorkOrder}$$

Appendix E: Borough and Citywide-Level Services

AMPS and Daily Tasks only account for a portion of the labor completed by maintenance staff, and many staff do not track their work using these systems. For more information about what work is and is not formally tracked, see the "About the Data Used in this Report" section of the report body. The remaining cost of this maintenance is accounted for using payroll data.

1. First, the payroll cost of borough-level staff is calculated for each title:

Payroll Total Quarterly Borough Costs =

For each quarter and borough:
$$\sum_{Title} Payroll\ Cost_{Title}$$

2. Next, the cost of labor already accounted for in park-level or borough-level work orders is calculated. These work orders are grouped by borough.

Total Quarterly Borough Labor Costs =

For each borough: $\sum_{Property} Total Quarterly Property Labor Costs_{Property}$

3. Finally, the cost of services not accounted for in AMPS or Daily Tasks is calculated by subtracting the labor costs from the total payroll costs to avoid double counting.

Borough Level Services not accounted for in AMPS or Daily Tasks =

Payroll Total Quarterly Borough Costs – Total Quarterly Borough Labor Costs
